

WATER PROPULSION

RESCUE BOARD

*Jetson*TM

JETSON™ TECHNOLOGY

READY TO SAVE LIVES

The **Jetson™ RESCUE BOARD** -*Patent Pending*- combine a fully tested shape to suit any water rescue situation along with the safety provided by the extra push of it's **integrated jet**, ensuring a rapid response to any emergency.

CONTROL PANEL

Four (4) power levels to reach the propulsion needed on each rescue or in practice sessions. The control panel offers performance enhancing electronics to save victim's lives.

STRAPS

Assists lifeguard and victim with rescue and safe return to the beach. In tests and trials Jetson Rescue Board arrives first to the victim before the jet ski or conventional life-guard paddle board.

BATTERIES

Specially designed to optimize Lithium ion low weight and guarantee extra water propulsion to insure the fastest response of lifeguard rescue teams on critical rescue moments for quick return to the beach.

JET

Aluminum propeller with tested durable design to propel the rescue board in all wind, water and rip current conditions where a single second could be decisive to save a life.

10'2" | 26" | 4.33" – 24.16 lbs. - without battery

*Warranty: 2 years

* The two years warranty covers all mechanical and electrical on the battery, charger and 10'2" Rescue board.
